

## **1. INTRODUCTION**

**1.1 Company Profile**

**1.2 Project Profile**

## 1.1 Company Profile

Credence Technologies is a software development company based in Surat, Gujarat, India. We currently specialize in Web Designing and Web Development,

Mobile Application Development, Desktop Application. Our team consists of dynamic and curious people who work hard and smart. We also constantly try to learn new things; be they in our field or outside of it, thus upgrading both our skills and lives.

Our team has members with experience in,

- Web Development and Design
- Web based Recruitment Management System
- ERP Softwares

## 1.2 Project Profile

**Project Title:** Quick Search

**Project Definition:** This website aims to provide the user to search for their daily needs. It allows Vendor to add their products and services and select the theme to make their own website.

**Organization:** Credence Technologies

**Project Category:** Web Based Application

**Team Members:** 2

**Duration:** 75 days

**Internal Project Guide:** Dr Pushpal Desai.

**External Project Guide:** Mr Tejas Shah

**Submitted By:** Shashank Bansal

**Submitted To:**

Dinal Chauhan(010)

Smit Patel(081)

M.Sc. (IT) Programme, J. P. Dawer Institute Of Information Science & Technology- VNSGU – Surat.

## 2. CURRENT SYSTEM

### 2.1 Introduction

## 2.1 Introduction

In Quick Search, Admin provides theme structure to vendors (shopkeeper), as per the requirement of the vendor they can select and unselect. Vendors have choice to insert data into the theme or not, if any tab like service or product is not necessary then he/she can ignore. User can visit the site of selected shop and also see location of the selected shop. It provides online searched solution to user and also provides themes to vendor.

The overall goal of this website is that it is available for anybody and anywhere. This saves a lot of time and money of the user and as well as vendor.

## 3. PROPOSED SYSTEM

- 3.1 Scope
- 3.2 Objectives
- 3.3 Purpose
- 3.4 Feasibility Study
- 3.5 Advantages

## 3. Proposed System

The proposed system of a website that of a website has an online platform, or site that focuses on shop details according to the needs of users, tracking the site by category and location.

It is difficult for the user to find the shops of his/her needs near by his/her area. He/she has to contact that person who has information about the shops. The user can not directly contact to the vendor for inquiry. To get the information about the product and service user must has to visit the shop. So it is quite costly and time consuming.

The system is design in such a way that the vendor who can not afford his/her own website can register in this website. The user can easily find the shops for his/her needs. If user is loged in than he/she is able to get all the information about the particular shop from its website. So it save money and time of the user as well as vendor.

### 3.1 Scope

User can search vendors as per their need and based on that search user are able to see the related shop. User can see only that shops which are registered by the vendor. User can see the website of a vendors only after he/she is login into the website.

Vendor allow to register his/her shop and add the details of product, service, shop logo, slider image, testimonials, team, contact, about and search details. If the vendor is approved by the admin then he/she is able to select the theme for his/her website.

Admin are authorised to approve or disapprove the vendor. The password is send to the vendor on his/her email id when admin approve the vendor.

## 3.2 Objectives

### 1.) Admin Module

The Administration can perform following tasks.

- Login
  - Admin can change his/her password.
- Manage Vendor
  - Admin can add vendor.
  - Admin can approved vendor and mail them password for login.
- Manage Theme
  - Admin can keep updating the theme when new theme are launch.
- Manage Business
  - Admin can keep updating the business category and business type.

### 2.) Vendor Module

The Vendor can perform following tasks

- Login/SignUp
  - Vendor can SignUp as well as login with authentication.
  - Vendor can change his/her password.
- Vendor can manage the logo,slider details,about,products,services,social media,team,testimonials,contact and search details by adding,updating and deleting the information.
- Vendor can update their profile.

### 3.) User Module

The User can perform following

- Login/SignUp
  - User can create new account in website.
  - User can create their own password.
- User can visit the site for the selected shop and also see the location of the selected shop.
- It provides online search solution for the user.

### 3.3 Purpose

Purpose of the Quick Search is to promote the vendor who can not afford to make their own website so he/she can register and if he/she is approved by the admin he/she can select the theme for his/her website.

It also provides help to user by easily searching for the shops based on their requirements.

It saves time and money of the user as well as vendors.

### 3.4 Feasibility Study

A feasibility study was conducted to select the best system that meets performance requirements and this involved an identification description, an evaluation of candidate systems, and the selection of the best systems.

In deciding on this system to design, three key considerations are involved in feasibility analysis: technical, economical and operational. It was found that the proposed system is technically, economically and operationally feasible as per the following grounds:

### 3.4.1 Technical

The system was developed using HTML, PHP, and JavaScript, CSS, Jquery.

1. The application was developed with window as operating system.
2. The application is interactive i.e. user friendly, thus viewing information and the related features is easy retrieval and access of data is provided.

According to the definition of technical feasibility the compatibility between front-end and back-end is very important. In our project the compatibility of both is very good. The speed of output is very good when we enter the data and click button then the response time is very fast and give result very quickset. The speed of transaction is always smooth and constant. This software provides facility to communicate data to distance-location.

### 3.4.2 Economic

Economic analysis is the most frequently used technique for evaluating the effectiveness of a proposed system. More commonly known as cost/benefit analysis: the procedure is to determine the benefits and saving that are expected from a proposed system and compare them with cost. If a benefit outweighs cost, a decision is taken to design and implement the system.

Otherwise, further justification or alternative in the proposed system will have to be made if it is to have a chance of being approved. This is an ongoing effort that improves accuracy at each phase of the system life cycle.

This application required less money, it is better for the company because, as the system is being developed with less money and already available resources. Also time and cost for set.

### 3.4.3 Operational

The proposed system is beneficial only if they can be turned into information system will meet the organization operating requirements.

As the application is user-friendly, throughout the application is also well liked & approved by the user showing no resistance what so ever at all. If the user wants more facility, it can be provided.

The proposed system without causing any harm to the organization will enhance the results in better respect of the new system and will avoid the confusions and resistance by catching the user's attention.

#### 3.4.4 Schedule Feasibility

Time evaluation is the most important consideration in the development of project. The time schedule required for the project is very important since more development Time effect machine time, cost and cause delay in the development of other systems. A reliable Web application can be developed in the considerable amount of time.

#### 3.4.5 Social

The system does not disturb the working style of any other systems of the company, contrary it become a separate module. Thus it fully satisfies Social Feasibility.

### 3.5 Advantages

- To find any Shops with their path easily.
- Vendors can able to make website without coding, they only wants to entered their details.

## 4. SYSTEM ENVIRONMENT

4.1 Technology Description

4.2 Hardware and Software requirement

## 4.1 Technology Description

<b>Front End</b>	: PHP
<b>Back End</b>	: MY-SQL Version 8.0.12
<b>Framework</b>	: Core PHP with prepared statement
<b>Operating System</b>	: Windows 10

## 4.2 Hardware and Software requirements

### 4.2.1 Hardware Configuration

<b>Processor</b>	: 2.5 GHz Intel Core i5 7 <sup>th</sup> Gen
<b>Hard Disc</b>	: 1.00 TB
<b>RAM</b>	: 8.00 GB
<b>CD Drive</b>	: PLDS DVD+-RW DU8A5LH DVD/CD-ROM
<b>Key Board</b>	: Chiclet Key Board
<b>Mouse</b>	: Microsoft Optical Mouse
<b>Monitor</b>	: 15.6"HD DELL Color Monitor
<b>Networking</b>	: Lan Card (Must be internet connection) or modem

### 4.2.2 Software Configuration

- XAMP 7.2.1
- Google Chrome,Mozilla Firefox

### 4.2.3 Server Configuration

- Apache version:
  - Apache/2.4.39
- PHP version:
  - PHP 7.0.0
- MySQL Version:
  - MySQL 8.0.12

## 5.1 Software requirement specification

**Requirements of client describe as follow:**

- ⊕ System should provide secure and accurate data.
- ⊕ System should easy to operate.
- ⊕ System should provide information related to firm.

**Requirement of different users can be describe as follows:**

**⊕ Admin**

- In this section, Admin can login to his/her account and can access data.
- If admin forgot password then he/she can receive new password through email.
- Admin can also change the password if he/she know his/her current password.
- Admin can view user.
- Admin can manage business category and business type.
- Admin can add vendor and has rights to approve or disapprove vendor.
- Admin can view report categorywise and business typewise.

**⊕ Vendor**

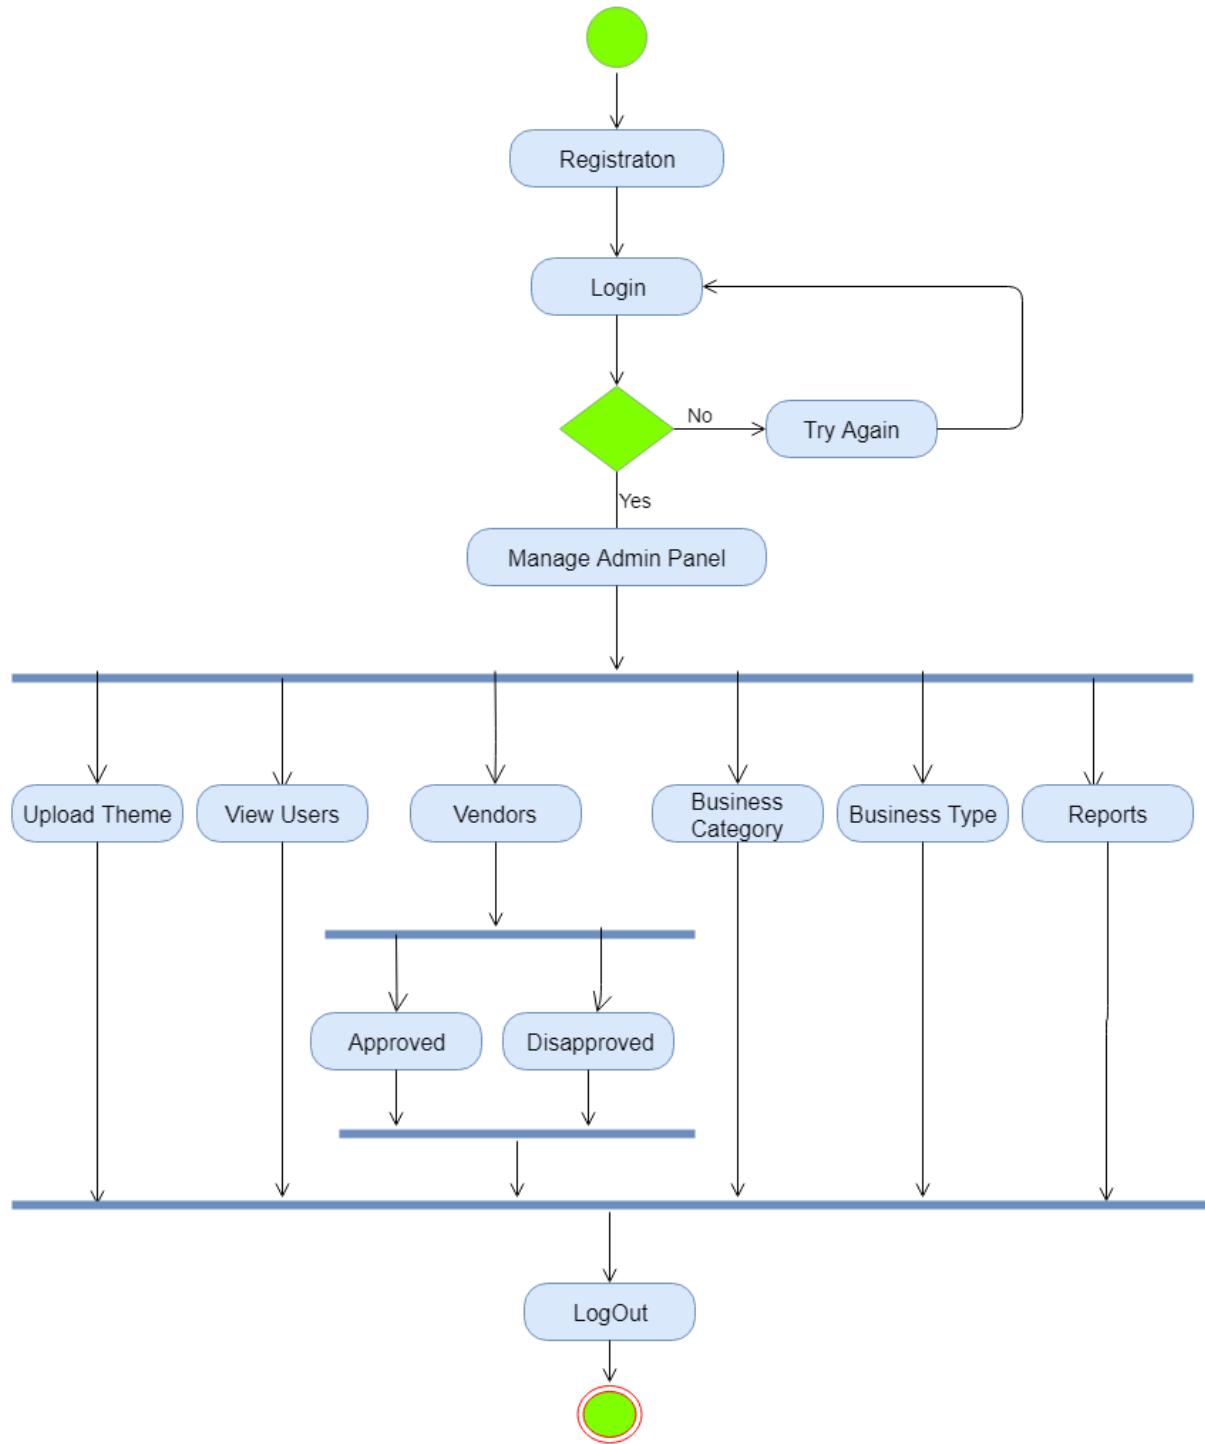

- In this section, Vendor can register his/her shop on the web.
- Vendor can login to his/her account and can manage the data to make his/her shop website.
- If vendor forgot password then he/she can receive new password through email.
- Vendor can also change password if he/she know his/her current password.
- Vendor can also update his/her profile.
- Vendor can manage about, logo, product, service, slider, followus, team, testimonials, contact and keyword details.
- Vendor can view themes and apply any one theme for his/her website.

**⊕ User**

- In this section, Users must registered and followed by login to show the website of selected shop.
- Users are able to search shop by the category or keyword.
- Users can also send the messages through the email.

## 5.5 Data Dictionary

### 1. admin

Name	Admin Detail
Alias Name	None
Where and How used?	- Store the details of admin. - verify the data at the time of admin login and forgot password.
Description	admin_id(Primary Key)+ admin_name + admin_password + admin_email

### 2. theme

Name	Theme Detail
Alias Name	Website
Where and How used?	- Store the details of theme. - It is use by vendor to select theme for his/her shop. - Theme folder is upload by admin. - Admin can add/update/delete and view theme data.
Description	theme_id(Primary Key)+ theme_name + theme_url + theme_icon

### 3. type

Name	Business Type Detail
Alias Name	None
Where and How used?	- Store the details of business type. - It is use by vendor to select his/her business type. - Admin can add/update/delete and view data.
Description	type_id(Primary Key)+ type_name

#### 4. category

Name	Category Detail
Alias Name	None
Where and How used?	<ul style="list-style-type: none"><li>- Store the details of business category.</li><li>- Admin can add/update/delete and view data.</li><li>- It is use by vendor to select his/her business category.</li><li>- It is also use by user to search shop through the category.</li></ul>
Description	category_id(Primary Key)+ category_name + category_image

#### 5. vendor

Name	Vendor Detail
Alias Name	Shop
Where and How used?	<ul style="list-style-type: none"><li>- Store the details of vendor and his/her shop.</li><li>- Admin can approved or disapproved vendor.</li><li>- Add data when vendor register for his/her shop.</li><li>- It is use by the user when user search for the shop details.</li></ul>
Description	vendor_id(Primary Key)+ shop_name + vendor_image + vendor_name + vendor_email + vendor_contactno + vendor_company_idproof + description + address + password + registration_date + category_id + type_id + approve + theme_id

#### 6. about

Name	About Detail
Alias Name	None
Where and How used?	<ul style="list-style-type: none"><li>- Store the about details of vendor's shop.</li><li>- Vendor can add/update/delete and view data.</li><li>- The data is display in the vendor's shop website.</li></ul>
Description	about_id(Primary Key)+ vendor_id + baner_image + about_image + description + about_mission + about_vision + about_success

## 7. contact

Name	Contact Detail
Alias Name	None
Where and How used?	<ul style="list-style-type: none"><li>- Store the contact details of vendor's shop.</li><li>- Vendor can add/update/delete and view data.</li><li>- The data is display in the vendor's shop website.</li></ul>
Description	contact_id(Primary Key)+ vendor_id + phone_no1 + phone_no2 + email + address + contact_image + contact_name

## 8. logo

Name	Logo Detail
Alias Name	None
Where and How used?	<ul style="list-style-type: none"><li>- Store the logo of vendor's shop.</li><li>- Vendor can add/update/delete and view data.</li><li>- The data is display in the vendor's shop website.</li></ul>
Description	logo_id(Primary Key)+ vendor_id + image

## 9. Product

Name	Product Detail
Alias Name	None
Where and How used?	<ul style="list-style-type: none"><li>- Store the product details of vendor's shop.</li><li>- Vendor can add/update/delete and view data.</li><li>- The data is display in the vendor's shop website.</li></ul>
Description	product_id(Primary Key)+ vendor_id + title + product_price + banner_image + product_image + description + short_description

## 10. Search

Name	Search Detail
Alias Name	None
Where and How used?	<ul style="list-style-type: none"><li>- Store the keyword of vendor's shop.</li><li>- Vendor can add/update/delete and view data.</li><li>- The data is use when the user search the shop via keyword.</li></ul>
Description	search_id(Primary Key)+ vendor_id + shop_name + description + keyword

## 11. service

Name	Service Detail
Alias Name	None
Where and How used?	- Store the service details of vendor's shop. - Vendor can add/update/delete and view data. - The data is display in the vendor's shop website.
Description	service_id(Primary Key)+ vendor_id + title + icon + banner_image + service_image + description + short_description

## 12. slider

Name	Slider Detail
Alias Name	None
Where and How used?	- Store the slider image for vendor's shop website. - Vendor can add/update/delete and view data. - The data is display in the vendor's shop website.
Description	slider_id(Primary Key)+ vendor_id + slider_image

## 13. social\_media

Name	Social Media Detail
Alias Name	Follow_us
Where and How used?	- Store the follow us details of vendor's shop. - Vendor can add/update/delete and view data. - The data is display in the vendor's shop website.
Description	socialmedia_id(Primary Key)+ vendor_id + media_name + link

## 14. team

Name	Team Detail
Alias Name	None
Where and How used?	- Store the team members details of vendor's shop. - Vendor can add/update/delete and view data. - The data is display in the vendor's shop website.

Description	team_id(Primary Key)+ vendor_id + team_image + name + designation + short_description
-------------	---

## 15. testimonials

Name	Testimonials Detail
Alias Name	review
Where and How used?	<ul style="list-style-type: none"><li>- Store the reviews of vendor's shop.</li><li>- Vendor can add/update/delete and view data.</li><li>- The data is display in the vendor's shop website.</li></ul>
Description	testimonial_id(Primary Key)+ vendor_id + title + designation + review

## 16. user

Name	User Detail
Alias Name	client
Where and How used?	<ul style="list-style-type: none"><li>- Store the user details.</li><li>- verify the data at the time of login and forgot password.</li><li>- Add data through user registration.</li></ul>
Description	user_id(Primary Key)+ user_name + password + contact_no + email

## 5.6 Process Specification

### Admin Side

Process : 1

<b>Name</b>	Login
<b>Description</b>	This process will take login information as input from admin and will compare that information with data stored in admin table. If provided data is correct then system will create a session else will show an error.
<b>Input Data Flow</b>	Admin name and password from admin
<b>Output Data Flow</b>	Send request to dashboard or Error Message

Process : 2

<b>Name</b>	Manage Theme
<b>Description</b>	In this process admin can add,update and delete theme in database. Admin can also upload the theme folder.
<b>Input Data Flow</b>	Admin can manage theme name,url and icon and upload theme folder.
<b>Output Data Flow</b>	If the admin insert/update/delete the theme information then it will reflect to the database and also in admin panel.

Process : 3

<b>Name</b>	View User
<b>Description</b>	In this process admin can view the user data from the database.
<b>Input Data Flow</b>	Admin sent request to the database.
<b>Output Data Flow</b>	Receive user data from the database.

#### Process : 4

<b>Name</b>	Manage Vendor
<b>Description</b>	In this process admin can register vendor. Admin can view vendor and can approve and disapprove vendor.
<b>Input Data Flow</b>	Admin add vendors information for registration or give approval or disapproval to vendor.
<b>Output Data Flow</b>	When vendor gets approval from client they can login for their panel using password sent via email.

#### Process : 5

<b>Name</b>	Manage Business Category
<b>Description</b>	In this process admin can add category and also can view, update and delete data from the database.
<b>Input Data Flow</b>	Admin can manage category name and image.
<b>Output Data Flow</b>	If the admin insert/update/delete the category information then it will reflect to the database and also in admin panel.

#### Process : 6

<b>Name</b>	Manage Business Type
<b>Description</b>	In this process admin can add business type and also can view, update and delete from the database.
<b>Input Data Flow</b>	Admin can manage business type.
<b>Output Data Flow</b>	If the admin insert/update/delete the business type then it will reflect to the database and also in admin panel.

#### Process : 7

<b>Name</b>	View report
<b>Description</b>	In this process admin can view report based on the business category wise shop and business type wise shop.
<b>Output Data Flow</b>	Admin will get the data from the database and it will reflect in the admin panel

#### Process : 8

<b>Name</b>	Forgot Password
<b>Description</b>	In this process admin can get the new password through the email.
<b>Input Data Flow</b>	Forget password accepts as input Email ID entered by the admin.
<b>Output Data Flow</b>	If Email ID is valid then Admin can get the new password.

#### Process : 9

<b>Name</b>	Change Password
<b>Description</b>	In this process admin can change the password if he/she know his/her current password.
<b>Input Data Flow</b>	change password accepts as input current password and new password and re-entry of new password entered by the admin.
<b>Output Data Flow</b>	If current password is match and new password and reset password is same then new password is reflect in the database.

## Vendor Side

Process : 1

<b>Name</b>	Registration
<b>Description</b>	This process will let vendor register his/her shop on web.so that user can search for his/her shop and view his/her shop website.
<b>Input Data Flow</b>	Vendor Registration modules accepts the vendor information for registration.
<b>Output Data Flow</b>	When client is registered with their Information then they can redirect to success page.

Process : 2

<b>Name</b>	Login
<b>Description</b>	This process will take login information as input from vendor and will compare that information with data stored in vendor table. If provided data is correct then system will create a session else will show an error.
<b>Input Data Flow</b>	Vendor name and password from vendor.
<b>Output Data Flow</b>	Send request to dashboard or Error Message

Process : 3

<b>Name</b>	Forgot Password
<b>Description</b>	In this process vendor can get the new password through the email.
<b>Input Data Flow</b>	Forget password accepts as input Email ID entered by the vendor.
<b>Output Data Flow</b>	If Email ID is valid then vendor can get the new password.

#### Process : 4

<b>Name</b>	Change Password
<b>Description</b>	In this process vendor can change the password if he/she know his/her current password.
<b>Input Data Flow</b>	change password accepts as input current password and new password and re-entry of new password entered by the vendor.
<b>Output Data Flow</b>	If current password is match and new password and reset password is same then new password is reflect in the database.

#### Process : 5

<b>Name</b>	Manage About Us
<b>Description</b>	In this process vendor can add details and can view,update and delete the about us details.
<b>Input Data Flow</b>	vendor can manage banner image,about image,description,mission,vision and success for his/her shop's website.
<b>Output Data Flow</b>	If the vendor insert/update/delete the about us information then it will reflect to the database and also in their panel.

#### Process : 6

<b>Name</b>	Manage Logo
<b>Description</b>	In this process vendor can add,view,update and delete logo for his/her shop website.
<b>Input Data Flow</b>	vendor can manage logo for his/her shop's website.
<b>Output Data Flow</b>	If the vendor insert/update/delete the logo then it will reflect to the database and also in their panel.

### Process : 7

<b>Name</b>	Manage Products
<b>Description</b>	In this process vendor can add,view and update product details,which he/she wants to display in his/her shop website. Vendor can active or deactivate the product.Vendor can also manage the product history through the deactivated product.
<b>Input Data Flow</b>	vendor can manage product title,price,bannerimage,product image,description,sortorder and short description for his/her shop's website.
<b>Output Data Flow</b>	If the vendor insert/update/deactive/active the product information then it will reflect to the database and also in their panel.

### Process : 8

<b>Name</b>	Manage Services
<b>Description</b>	In this process vendor can add,view and update service details,which he/she wants to display in his/her shop website. Vendor can active or deactivate the service.Vendor can also manage the service history through the deactivated service.
<b>Input Data Flow</b>	vendor can manage service title,icon,banner image,service image,description,sortorder and short description for his/her shop's website.
<b>Output Data Flow</b>	If the vendor insert/update/deactive/active the service information then it will reflect to the database and also in their panel.

### Process : 9

<b>Name</b>	Manage Slider
<b>Description</b>	In this process vendor can add slider image and can view,update and delete the slider image.
<b>Input Data Flow</b>	vendor can manage slider image for his/her shop's website.
<b>Output Data Flow</b>	If the vendor insert/update/delete the slider image then it will reflect to the database and also in their panel.

### Process : 10

<b>Name</b>	Manage Follow Us
<b>Description</b>	In this process vendor can add follow details and can view,update and delete the follow us details.
<b>Input Data Flow</b>	vendor can manage media name and link for his/her shop's website.
<b>Output Data Flow</b>	If the vendor insert/update/delete the follow us details then it will reflect to the database and also in their panel.

### Process : 11

<b>Name</b>	Manage Team
<b>Description</b>	In this process vendor can add team members and can view,update and delete the team members details.
<b>Input Data Flow</b>	vendor can manage team name,image,designation and short description for his/her shop's website.
<b>Output Data Flow</b>	If the vendor insert/update/delete the team details then it will reflect to the database and also in their panel.

**Process : 12**

<b>Name</b>	Manage Testimonials
<b>Description</b>	In this process vendor can add reviews and can view,update and delete the reviews for his/her shop website testimonials.
<b>Input Data Flow</b>	vendor can manage person name,designation and review for his/her shop's website.
<b>Output Data Flow</b>	If the vendor insert/update/delete the testimonials details then it will reflect to the database and also in their panel.

**Process : 13**

<b>Name</b>	Manage Contact
<b>Description</b>	In this process vendor can add contact details and can view,update and delete the contact details.
<b>Input Data Flow</b>	vendor can manage contact name,image,address,phone no and email for his/her shop's website.
<b>Output Data Flow</b>	If the vendor insert/update/delete the contact details then it will reflect to the database and also in their panel.

**Process : 14**

<b>Name</b>	Manage Keyword
<b>Description</b>	In this process vendor can add keyword for search his/her shop and can view,update and delete the keyword for his/her shop.
<b>Input Data Flow</b>	vendor can manage description and keyword for his/her shop's website.
<b>Output Data Flow</b>	If the vendor insert/update/delete the search details then it will reflect to the database and also in their panel.

**Process : 15**

<b>Name</b>	Select theme
<b>Description</b>	In this process vendor can view all the themes provided by the admin and can select the theme for his/her shop website.
<b>Input Data Flow</b>	vendor can view all the themes and apply one of them.
<b>Output Data Flow</b>	If the vendor applied theme then it will reflect to the database and also in their panel.

**Process : 16**

<b>Name</b>	Edit Profile
<b>Description</b>	In this process vendor can view all his/her personal and shop details and can update his/her personal and shop details.
<b>Input Data Flow</b>	vendor can edit his/her information for his/her shop's website.
<b>Output Data Flow</b>	If the vendor edit information then it will reflect to the database and also in their panel.

## Client Side

**Process : 1**

<b>Name</b>	Search Shop
<b>Description</b>	In this process User can search for the shops as per their needs and view the list of the shops as per search. User can search through the category and keyword.
<b>Input Data Flow</b>	User can search shop via category and keyword.
<b>Output Data Flow</b>	Display all shop of selected category or keyword to the user.

#### Process : 2

<b>Name</b>	Registration
<b>Description</b>	This process will let user register himself/herself on web.so that user can view the website of selected shop.
<b>Input Data Flow</b>	User Registration modules accepts the user information for registration.
<b>Output Data Flow</b>	When user is registered with their Information then they can redirect to login page.

#### Process : 3

<b>Name</b>	Login
<b>Description</b>	This process will take login information as input from user and will compare that information with data stored in user table. If provided data is correct then system will create a session else will show an error.
<b>Input Data Flow</b>	User name and password from user.
<b>Output Data Flow</b>	Send request to home page or Error Message

#### Process : 4

<b>Name</b>	Forgot Password
<b>Description</b>	In this process user can get the new password through the email.
<b>Input Data Flow</b>	Forget password accepts as input Email ID entered by the user.
<b>Output Data Flow</b>	If Email ID is valid then user can get the new password.

**Process : 5**

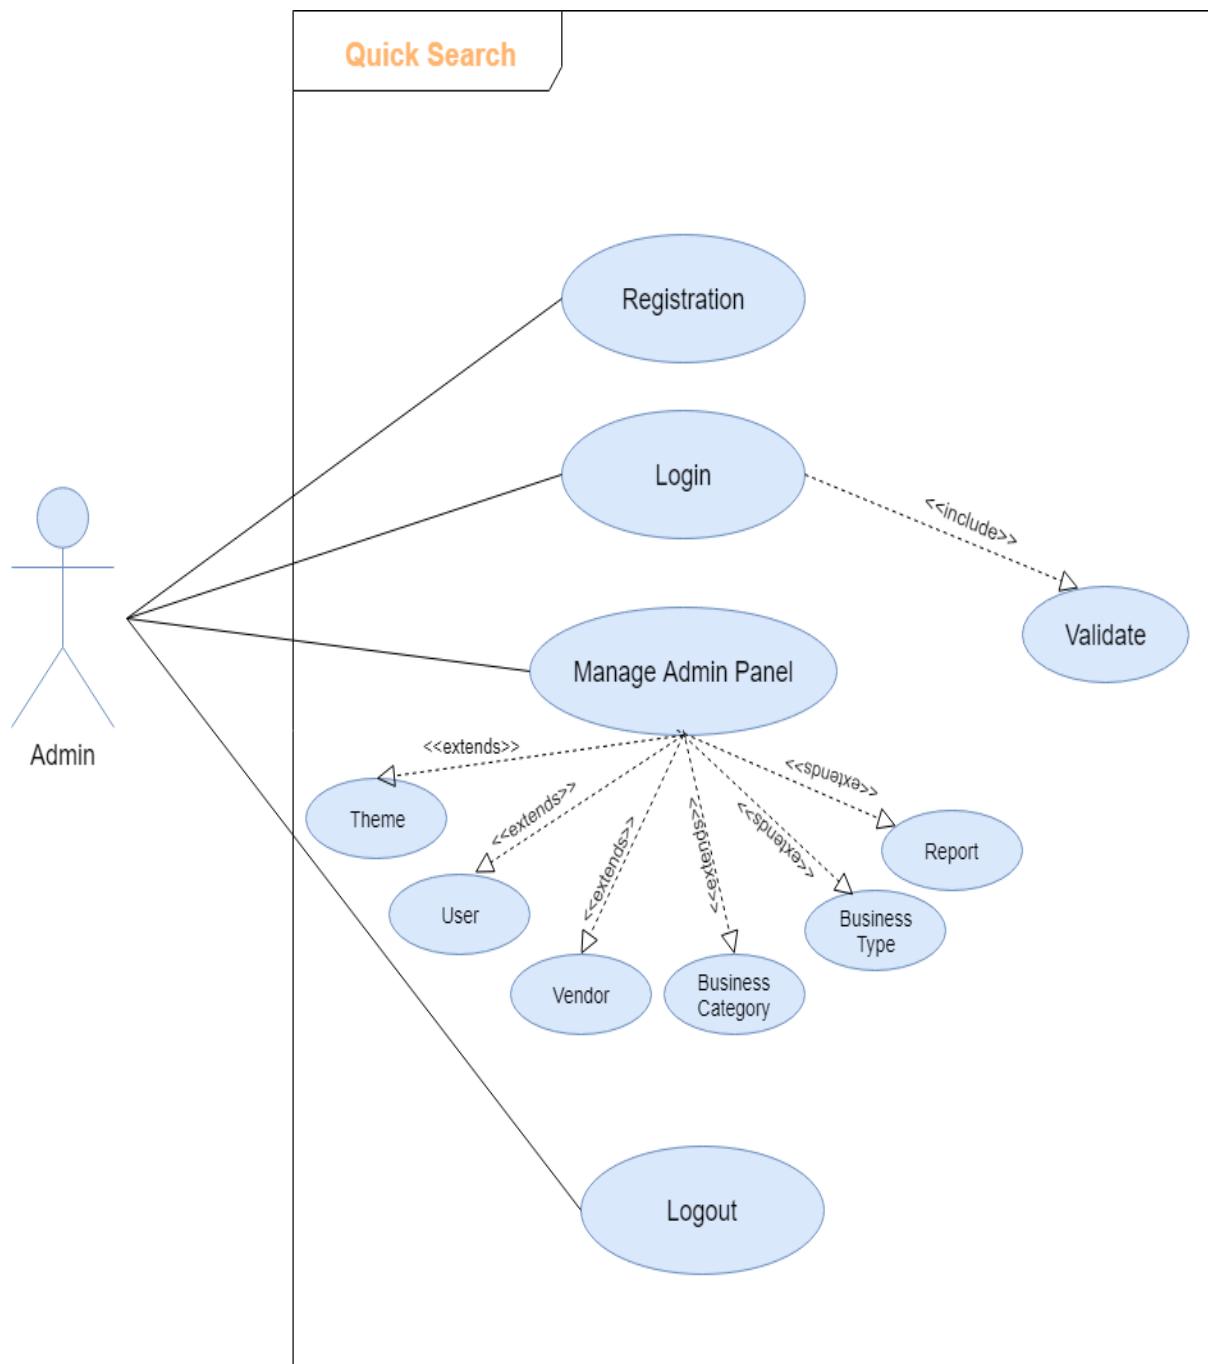

<b>Name</b>	Change Password
<b>Description</b>	In this process user can change the password if he/she know his/her current password.
<b>Input Data Flow</b>	change password accepts as input current password and new password and re-entry of new password entered by the user.
<b>Output Data Flow</b>	If current password is match and new password and reset password is same then new password is reflect in the database.

**Process : 6**

<b>Name</b>	View Website
<b>Description</b>	In this process user can view website of selected shop and can contact vendor through the inquiry form and shop details. User can also view the map for a selected shop in shop's website.
<b>Input Data Flow</b>	Select shop to view website of that shop.
<b>Output Data Flow</b>	Redirect page to the selected shop's website.

Field	DataType	Size	Key	Description
type_id	Int	11	Primary Key	Stores id of type
type_name	Varchar	255	Unique Key	Stores the type of business

### Table Name: user

Field	DataType	Size	Key	Description
user_id	Int	11	Primary Key	Stores id of user
user_name	Varchar	255	Unique Key	Stores name of user
Password	Varchar	255	-	Stores password of user
contact_no	Bigint	10	-	Stores contact number of user
Email	Varchar	255	Unique Key	Stores email of user

### Table Name: vendor

Field	DataType	Size	Key	description
vendor_id	Int	11	Primary Key	Stores vendor (Shopkeeper) ID.
shop_name	Varchar	255	Unique Key	Stores name of vendor's shop.
vendor_image	Text	-	-	Stores path of vendor image
vendor_name	Varchar	255	-	Stores name of vendor.

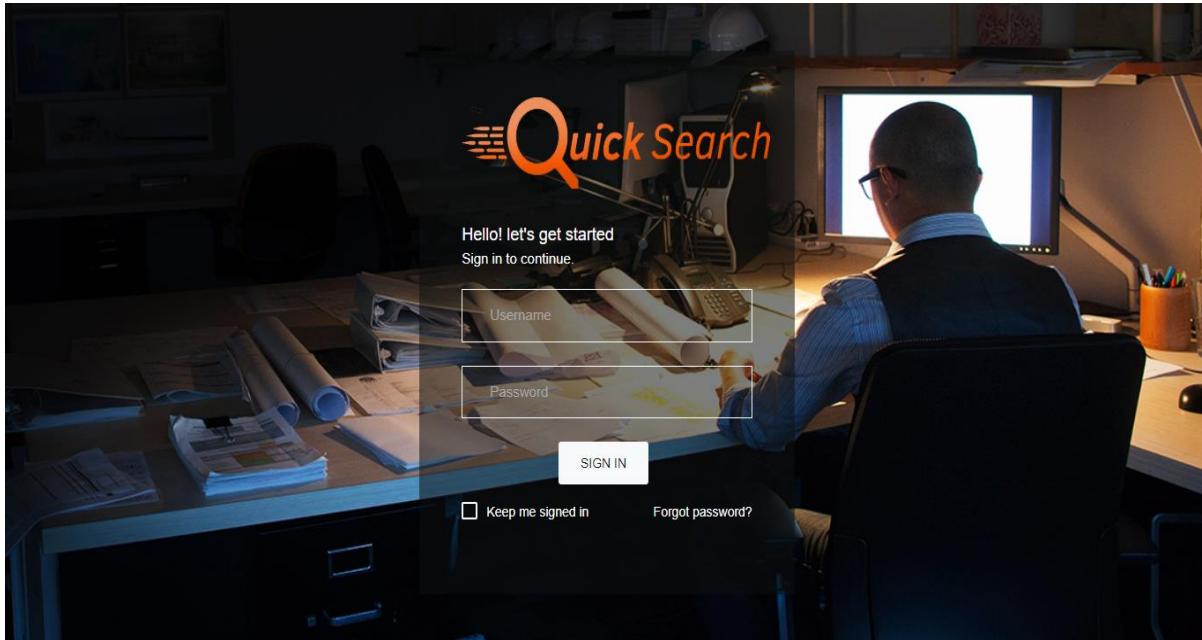

vendor_email	Varchar	255	-	Stores email id of vendor.
vendor_contacno	Bigint	10	-	Stores mobile no. of vendor.
vendor_company_idproof	Text	-	-	Stores path of company idproof
Description	Text	-	-	Stores short description of vendor's shop
Address	Varchar	255	-	Stores address of vendor's shop.
Password	Varchar	255	-	Stores password of vendor.
registration_date	Date	-	-	Stores registration date of vendor.
category_id	Int	11	Foreign Key	Stores business category of vendor's shop
type_id	Int	11	Foreign Key	Stores business type of vendor's shop
Approve	Int	11	-	Stores vendor's approval notification
theme_id	Int	11	Foreign Key	Stores vendor's selected theme id.

## 6.2 Interface Design

### Admin Side

#### ✓ Login Page

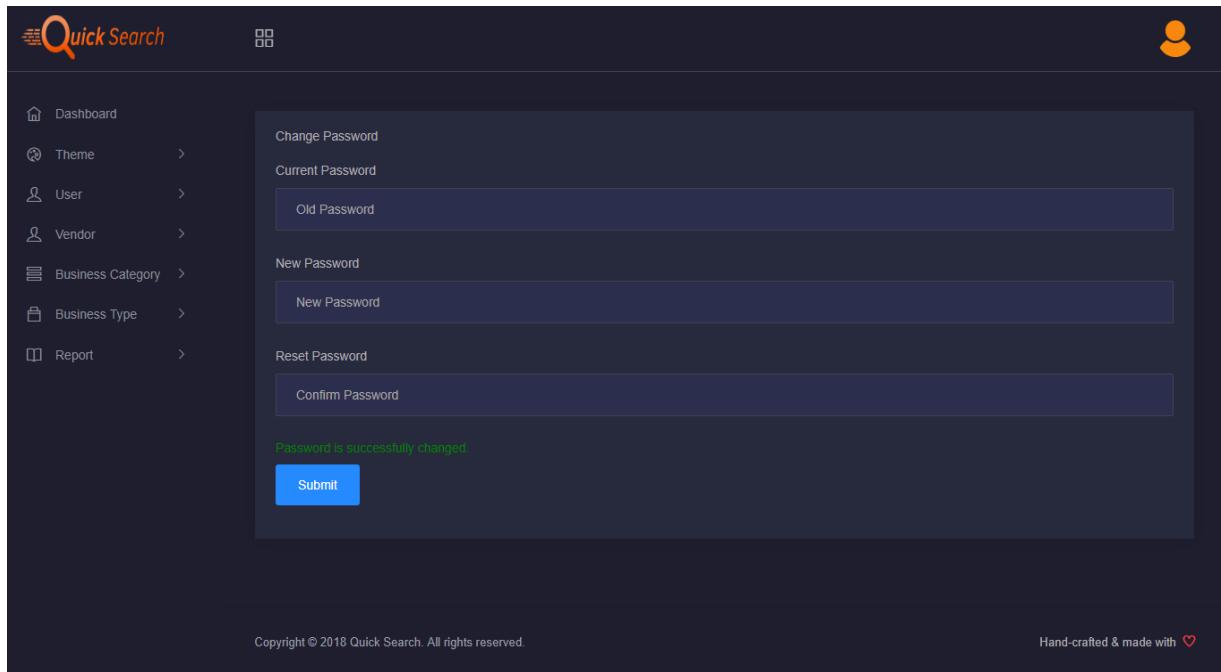

#### ✓ Dashboard

A screenshot of the Quick Search dashboard. The top navigation bar includes the "Quick Search" logo, a grid icon, and a user profile icon. On the left, a sidebar menu lists "Dashboard" (which is highlighted in blue), "Theme", "User", "Vendor", "Business Category", "Business Type", and "Report". The main content area displays four cards with statistics: "Number Of Themes" (13), "Number Of Vendors" (5), "Number Of Users" (10), and "Number Of Category" (10). At the bottom, there are copyright and footer links: "Copyright © 2018 Quick Search. All rights reserved." and "Hand-crafted &amp; made with ❤".

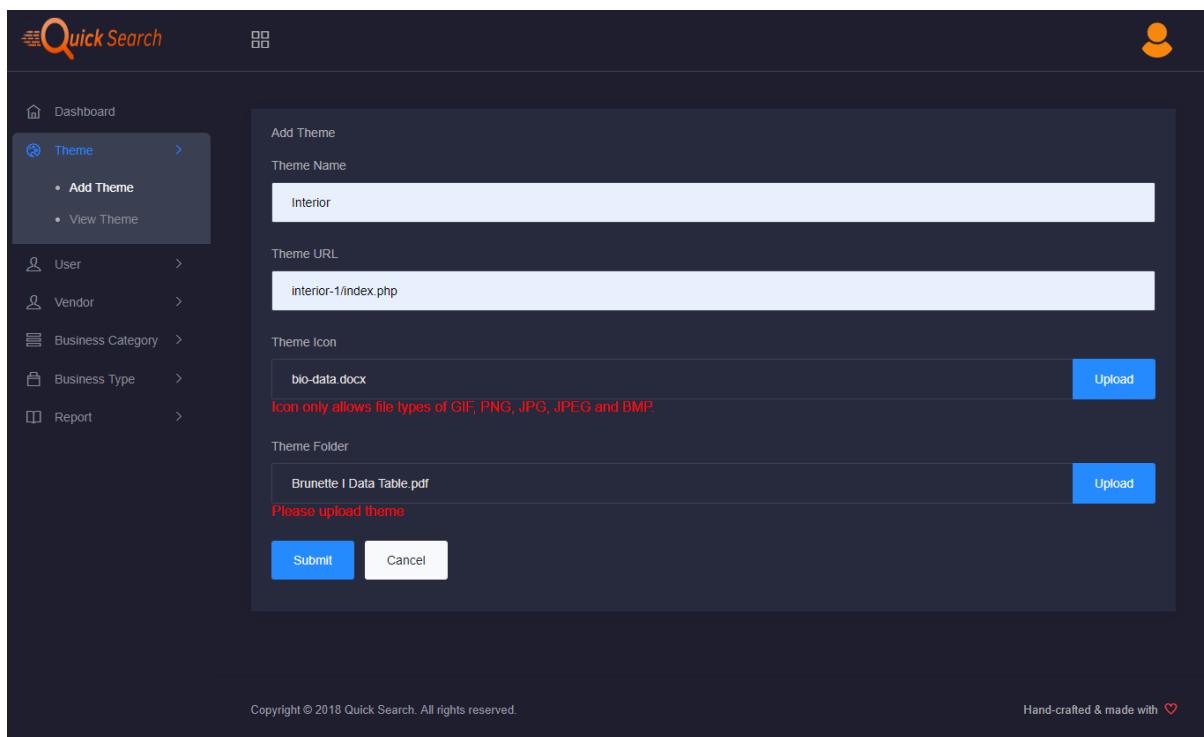

## ✓ Change Password

A screenshot of the "Change Password" page. On the left is a dark sidebar with navigation links: Dashboard, Theme (selected), User, Vendor, Business Category, Business Type, and Report. The main content area has a dark background with white text fields for "Old Password", "New Password", and "Confirm Password". A message at the bottom says "Password is successfully changed." and features a blue "Submit" button. At the bottom of the page, there's a copyright notice "Copyright © 2018 Quick Search. All rights reserved." and a credit "Hand-crafted & made with ❤".

## ✓ Add Theme

A screenshot of the "Add Theme" page. The sidebar shows "Theme" is selected under "Add Theme". The main form has fields for "Theme Name" (set to "Interior"), "Theme URL" (set to "interior-1/index.php"), "Theme Icon" (with a file named "bio-data.docx" selected, and a note: "Icon only allows file types of GIF, PNG, JPG, JPEG and BMP."), and "Theme Folder" (with a file named "Brunette I Data Table.pdf" selected, and a note: "Please upload theme"). It includes "Upload" buttons for both files. At the bottom are "Submit" and "Cancel" buttons. The footer contains the copyright notice and credit from the previous page.

## ✓ View Theme

The screenshot shows the 'Themes' section of the Quick Search application. On the left, a sidebar menu is open under the 'Theme' category, showing options like 'Add Theme' and 'View Theme'. The main area displays a table of themes with columns for 'Theme Name', 'Theme URL', 'Theme Icon', 'Update', and 'Delete'. Each row contains a small thumbnail icon representing the theme, followed by the theme name, its URL, and edit/delete icons. At the bottom of the table, it says 'Showing 1 to 10 of 13 entries' and has navigation buttons for 'Previous', '1', '2', and 'Next'.

Theme Name	Theme URL	Theme Icon	Update	Delete
Architecture	interior-2/index.php			
Barbarazz	salon-3/index.php			
Barber	salon-2/index.php			
Cafe	restaurant-3/index.php			
Designer	interior-3/index.php			
Food	restaurant-2/index.php			
Interior	interior-1/index.php			
Interior	interior-1/index.php			
Restaurant	restaurant-1/index.php			
salon	salon-1/index.php			

Showing 1 to 10 of 13 entries

## ✓ View User

A screenshot of the Quick Search application interface. The left sidebar has a dark theme with white icons and text. It includes links for Dashboard, Theme, User (selected), Vendor, Business Category, Business Type, and Report. The main content area is titled 'Users' and shows a table with columns: User Name, Contact No, and Email. The table contains 10 entries. At the bottom of the table, it says 'Showing 1 to 10 of 10 entries'. On the right side of the table, there are buttons for 'Previous', '1' (highlighted in blue), and 'Next'. The footer of the page includes copyright information and a link to GitHub.

## ✓ Add Vendor

The screenshot shows the 'Add Vendor' page of the Quick Search application. The interface has a dark blue header with the 'Quick Search' logo and a user profile icon. A sidebar on the left contains navigation links: Dashboard, Theme, User, Vendor (selected), Business Category, Business Type, and Report. The 'Vendor' link is highlighted with a blue box, and 'Add Vendor' is the active sub-item. The main content area is titled 'Add Vendor' and contains several input fields:

- Shop Name:** Input field with placeholder 'Enter Shop Name'.
- Vendor Name:** Input field with placeholder 'Enter Vendor Name'.
- Vendor Image:** Input field with placeholder 'Upload Vendor Image'. Below it is a red error message: 'Please upload an image'.
- Upload:** A blue 'Upload' button.
- Vendor Email:** Input field with placeholder 'Enter Vendor E-mail'.
- Company IDProof:** Input field with placeholder 'Id proof'. Below it is a red error message: 'Please upload an IDProof'.
- Upload:** A blue 'Upload' button.
- Contact No:** Input field with placeholder 'Enter Vendor Contact NO'.
- Address:** Input field with placeholder 'Address'. Below it is a red error message: 'Enter Vendor Address'.
- Category:** A dropdown menu currently set to 'Electronics'.
- Description:** Input field with placeholder 'Description'. Below it is a red error message: 'Enter Description'.
- Type:** A dropdown menu currently set to 'Retailer'.

At the bottom of the form are two buttons: 'Submit' (blue) and 'Cancel' (white).

At the bottom of the page, there is a footer bar with the text 'Copyright © 2018 Quick Search. All rights reserved.' and 'Hand-crafted & made with ❤'.

## ✓ View Vendor

The screenshot shows the 'Vendor' section of the application. On the left, a sidebar menu includes 'Dashboard', 'Theme', 'User', 'Vendor' (selected), 'Business Category', 'Business Type', and 'Report'. Under 'Vendor', there are 'Add Vendor' and 'View Vendor' options. The main content area is titled 'Vendors' and displays a table with columns: Address, Registration Date, Category, Type, Theme, and Action. The table contains five rows of vendor data, each with a 'Disapprove' button in the Action column.

Address	Registration Date	Category	Type	Theme	Action
2-565.sagampura surat	2019-06-04	Event Organisor	wholeseller	Barber	<button>Disapprove</button>
18,Shivam residency,Prime Market,Adajan,Surat	2019-06-05	Play School	Retailer	Transport	<button>Disapprove</button>

## ✓ Add Business Category

The screenshot shows the 'Business Category' section of the application. On the left, a sidebar menu includes 'Dashboard', 'Theme', 'User', 'Vendor', 'Business Category' (selected), 'Business Type', and 'Report'. Under 'Business Category', there are 'Add Business Category' and 'View Business Category' options. The main content area is titled 'Add Category' and contains fields for 'Category Name' (with placeholder 'category Name') and 'Category Image' (with a 'Upload' button). At the bottom are 'Submit' and 'Cancel' buttons.

## ✓ View Business Category

A screenshot of the Quick Search application's Business Category management screen. The interface has a dark blue header with the "Quick Search" logo on the left and a user profile icon on the right. Below the header is a navigation sidebar with links like Dashboard, Theme, User, Vendor, Business Category (which is currently selected), Business Type, and Report. The main content area is titled "Business Category" and shows a table of 10 entries. Each entry includes the category name, a small thumbnail image, and edit (pencil) and delete (trash bin) icons. The table has columns for "Category Name", "Category Image", "Update", and "Delete". At the bottom of the table, it says "Showing 1 to 10 of 10 entries" and has "Previous", "1", and "Next" buttons. The footer contains copyright information and a "Hand-crafted & made with ❤️" message.

## ✓ Update Business Type

A screenshot of the Quick Search application interface. On the left is a sidebar with navigation links: Dashboard, Theme, User, Vendor, Business Category, Business Type (which is selected and highlighted in blue), and Report. The main content area is titled "Business Type Form" and contains a "Type Name" input field with "Retailer" typed into it. Below the input field are two buttons: "Submit" (blue) and "Cancel". At the bottom of the page, there is copyright information: "Copyright © 2018 Quick Search. All rights reserved." and a footer note: "Hand-crafted & made with ❤".

## ✓ Categorywise Report

A screenshot of the Quick Search application interface. The sidebar shows the "Report" link is selected. Under "Report", there are two options: "View Categorywise Report" and "View Typewise Report". The main content area displays a horizontal bar chart with categories on the x-axis: Food, Event Organizer, Shopping, Travel, and Play School. The y-axis represents a count from 0 to 25. The bars show values of approximately 11 for Food, 19 for Event Organizer, 18 for Shopping, 12 for Travel, and 11 for Play School. At the bottom of the page, there is copyright information: "Copyright © 2018 Quick Search. All rights reserved." and a footer note: "Hand-crafted & made with ❤".

## ✓ View About

This screenshot shows the 'View About' section of the Quick Search application. On the left, a sidebar menu includes 'Dashboard', 'About' (which is currently selected), 'Logo', 'Product Details', 'Service Details', 'Slider Details', 'Social Media', 'Team', 'Testimonials', 'Contact Details', 'Search', and 'Theme'. The main content area is titled 'View About' and shows a table with one entry. The table has columns for 'Banner Image', 'About Image', and 'Description'. The first row contains a black circular logo thumbnail and a brown circular profile picture thumbnail. The 'Description' column contains the text: 'Excellence in teaching, learning, and research, and to developing leaders in many disciplines who make a difference'. Below the table, it says 'Showing 1 to 1 of 1 entries'. At the bottom right of the content area, there are 'Previous' and 'Next' buttons, with '1' in the center indicating the current page. A search bar is located at the top right of the main content area. The footer of the page includes 'Copyright © 2018 Quick Search. All rights reserved.' and 'Hand-crafted & made with ❤'.

## ✓ Update Logo

This screenshot shows the 'Logo Form' section of the Quick Search application. On the left, the same sidebar menu is visible. The main content area is titled 'Logo Form' and contains a single input field labeled 'Image' with the path 'image/logo6.png' displayed. To the right of the input field is a blue 'Upload' button. Below the input field are two buttons: a blue 'Submit' button and a white 'Cancel' button. The footer of the page includes 'Copyright © 2018 Quick Search. All rights reserved.' and 'Hand-crafted & made with ❤'.

## ✓ Add Product

The screenshot shows the 'Add Product' page within the Quick Search admin interface. On the left, a sidebar menu lists various site sections like Dashboard, About, Logo, and Product Details (which is currently selected). The main content area is titled 'Add Product' and contains several input fields:

- Title:** A text input field labeled 'Product Title' with placeholder text 'Enter Product Title'.
- Product Price:** A text input field labeled 'Product Price' with placeholder text 'Enter Product Price'.
- Banner Image:** A file upload section with a placeholder 'Upload Image' and a blue 'Upload' button. It includes a red error message 'Please upload banner image'.
- Product Image:** A file upload section with a placeholder 'Upload Image' and a blue 'Upload' button. It includes a red error message 'Please upload an image'.
- Description:** A text input field labeled 'Description' with placeholder text 'Description'.
- Sortorder:** A text input field labeled 'Sortorder' with placeholder text 'Sortorder'.
- Short Description:** A text input field labeled 'Short Description' with placeholder text 'Short Description'.

At the bottom of the form are two buttons: a blue 'Submit' button and a grey 'Cancel' button. The footer of the page includes copyright information 'Copyright © 2018 Quick Search. All rights reserved.' and a credit line 'Hand-crafted & made with ❤'.

## ✓ View Contact

The screenshot shows the 'View Contact' page of the Quick Search application. On the left, there is a sidebar with various navigation options: Dashboard, About, Logo, Product Details, Service Details, Slider Details, Social Media, Team, Testimonials, Contact Details (selected), Search (selected), and Theme. Under 'Contact Details', there are two items: 'Add Contact' and 'View Contact'. Under 'Search', there are two items: 'Add Search Details' and 'View Search Details'. The main content area is titled 'View Contact' and shows a table with one entry. The table columns are: contact Image, Contact Name, Phone No 1, Phone No 2, Email, Address, and Update. The single entry is for a contact named 'simran' with the following details: Phone No 1: 8965230147, Phone No 2: 7745221100, Email: shop55@gmail.com, Address: b-545, shopping mall vip road-surat. There is also a small edit icon next to the address. At the bottom of the table, it says 'Viewing 1 to 1 of 1 entries'. Below the table, there are 'Previous' and 'Next' buttons, with '1' in the middle indicating the current page. A search bar is located at the top right of the main content area. The footer of the page includes the copyright notice 'Copyright © 2018 Quick Search. All rights reserved.' and the text 'Hand-crafted & made with ❤'.

## ✓ Add Search Details

The screenshot shows the 'Add Search Details' page of the Quick Search application. On the left, there is a sidebar with various navigation options: Dashboard, About, Logo, Product Details, Service Details, Slider Details, Social Media, Team, Testimonials, Contact Details, Search (selected), and Theme. Under 'Search', there are two items: 'Add Search Details' (selected) and 'View Search Details'. The main content area is titled 'Add Search' and contains three input fields: 'Shop Name' (with 'simran' typed in), 'Description' (with a placeholder 'Description'), and 'Keyword' (with a placeholder 'Keyword'). At the bottom of the form, there are 'Submit' and 'Cancel' buttons. The footer of the page includes the copyright notice 'Copyright © 2018 Quick Search. All rights reserved.' and the text 'Hand-crafted & made with ❤'.

## ✓ View Search Details

A screenshot of the Quick Search application interface. On the left is a sidebar with navigation links: Dashboard, About, Logo, Product Details, Service Details, Slider Details, Social Media, Team, Testimonials, Contact Details, and two expanded sections under 'Search': 'Add Search Details' and 'View Search Details'. Below these is a 'Theme' link. At the bottom of the sidebar is a copyright notice: 'Copyright © 2018 Quick Search. All rights reserved.' On the right is the main content area titled 'View Search'. It shows a table with four entries. Each entry has columns for 'simran' (the user), the search query ('Selling all types of clothes for men and women.', 'Selling all products.', 'all cloths.', 'all products'), and the results ('tops', 'jeans', 't-shirts', 'women clothes'). To the right of each result are edit and delete icons. At the top of the content area is a search bar and a dropdown for selecting the number of entries to show (set to 10). At the bottom are navigation buttons for 'Previous', '1' (highlighted in blue), and 'Next'.

## Client-Side

### ✓ User Registration

A screenshot of a web browser window showing the "Sign Up" form. The form fields are: "Username" (placeholder: Enter Name), "Email" (placeholder: Enter E-mail), and "Contact No" (placeholder: Enter Contact NO). Below the form is a pink "Sign Up" button. At the bottom left of the modal, there is a link "Already a member? Sign In". The background shows a blurred view of the Quick Search homepage with a search bar and navigation menu.

### ✓ Login

A screenshot of a web browser window showing the "Sign In" form. The form fields are: "Username" and "Password". A red error message "UserName or Password is Invalid" is displayed above the "Username" field. There is also a checkbox "Keep me signed in" and a pink "Sign In" button. At the bottom left of the modal, there is a link "Not a member? Sign up" and at the bottom right there is a link "Recover Password". The background shows a blurred view of the Quick Search homepage with a search bar and navigation menu.

## ✓ Forgot Password

A screenshot of a web browser window displaying the Quick Search application. The page has a dark background with a blurred image of a city skyline at night. At the top, there is a navigation bar with links for Home, About, Categories, Listing, Contact, and Login or Register. A modal window titled "Forgot Password" is centered on the screen. It contains a single input field labeled "E-mail" and a large orange "Submit" button. In the bottom right corner of the modal, there is some small, illegible text. The browser's address bar shows the URL "localhost/client-side/index.php?e=3#". The taskbar at the bottom of the screen shows various open applications, including a search bar, file explorer, and browser icons. The date and time "10-06-2019 11:52" are also visible on the taskbar.

The screenshot shows a search interface with a header featuring the Direo logo and navigation links for Home, About, Categories, Listing, and Contact. A user profile icon for 'smit' is also present. The main content area displays a banner image of the Sydney Opera House and Harbour Bridge at night. Below the banner, the text 'All Listing' is centered, followed by a breadcrumb trail: Home > All Listings. The search form includes fields for 'All Items' (with a note 'Total Listing Found: 0'), a search query input, a dropdown for 'Select Category', and a purple 'Search' button. The central message area contains an orange warning triangle icon with a document and exclamation mark, and the text 'No Records Found' with a blue exclamation mark icon. A red 'Go to Home' button is located at the bottom of this section.
